

POLYTURF PLUS

DUAL DUROMETER SYSTEM

Beynon Sports Surfaces has developed the **next generation of polyurethane athletic surfacing** - PolyTurf-Plus.

PolyTurf-Plus features a bio-engineered force reduction layer beneath the PolyTurf wear layer to increase return of energy and shock absorbency - and take **athletic performance to the next level.**

Its resilient wear layer is tough enough to **endure the extreme demands** of daily training and competition - as well as the abuse of tables, chairs, and rolling loads.

The teaming of **superior performance and rugged durability** make PolyTurf-Plus a low maintenance, long lasting investment that will go the distance for your team.

Water-based color and gameline options are available upon request.
